

Renasculpt for Muscle Sculpting and Fat Reduction

! One 30-minute session is equal to 20,000 reps
(e.g. sit ups, squats, bicep curls, etc.)

What is Renasculpt?

Renasculpt is a non-invasive, pain-free body shaping procedure that uses radiofrequency heating for fat reduction and High Intensity Focused ElectroMagnetic energy (HIFEM®) for muscle strengthening and toning in a 30-minute session. The technology induces supramaximal muscle contractions equivalent to over 20,000 reps in 30 minutes. This stimulation activates 100% of the muscle 20,000 times in a 30-minute period. A Renasculpt session is similar to an incredibly intense workout but without sweating or a racing heart. The end result is more fat reduction and muscle growth for less effort, less time and less money.

What areas can be treated with the Renasculpt?

Renasculpt can be applied over the abdomen, buttocks, thighs, arms & calves. See separate brochure for pelvic floor dysfunction.

What are the benefits of Renasculpt?

- Increase Muscle
- Reduce Fat
- Cellulite Reduction
- Lymphatic Drainage
- Skin Tightening
- Treating Diastasis Recti (*Separation of the abdominals*)

One 30 minute session is \$150. With packages, can get as low as \$78 per session!
